

May Vestry Meeting Summary

The Vestry approved moving forward with the next phase of the church courtyard improvement project, authorizing architect drawings for lighting, landscaping, and the future columbarium to move into the bidding process. Planning also continued for future audio system improvements as part of broader campus enhancements.

Members finalized preparations for a joint Pentecost celebration with Espíritu Santo and approved plans for the ongoing parlor renovation, including donating selected furniture to Twin City Mission and purchasing new furnishings using memorial funds.

To strengthen campus security, the Vestry approved measures to lock designated church entrances once the 10:15 a.m. service begins and designated future concert revenue to fund upgraded door locks and keypad systems.

The Vestry also approved hosting a series of *Fever* concerts in the sanctuary during the coming season, creating a new community partnership while generating revenue to support security improvements. Additionally, parking lot usage fees were designated to support the church's Youth Fund.
